About Me

A Robotics Engineer with experience in deep learning, machine learning, computer vision, IoT, web development, and data analysis. Committed to exploring new technologies and finding innovative solutions to complex problems. Seeking opportunities to apply skills in a dynamic and challenging environment.

Technical Skills

- Deep Learning & ML
- Internet of Things (IoT)
- Web Development
- CAD Modelling
- Data Analysis
- Graphic Designing

Soft Skills

- Problem Solving
- Creativity
- Adaptability
- Eager to Learn New Things
- Teamwork

Portfolio

@abhimanyus1997

Projects

Jan 2023

cryptoTracker | Dashboard for tracking Ethereum Wallet

Financial dashboard that uses web scraping to provide real-time insights into the user's Ethereum blockchain wallet.
Built using Python, Flask, JavaScript, ChartJS, Bootstrap, and SQLite, it offers a user-friendly interface and is deployed on railway.app for easy accessibility

May 2022

Sketchmaker

Developed a serverless web application and an Android app using the Apache Cordova Framework, OpenCV.js, and Bootstrap 5 to create pencil like sketches all at client side

2018-2019

Pipe Inspection & Cleaning Robot

Final Year Project @ LNMIIT Designed and fabricated a complete robot with wireless control via an Android app, integrated SSH, MQTT, and RTSP protocols into a hybrid Android app using Apache Cordova.

2018

DIGIFIT | A Prototype of Basic Fitness Band

Biomedical Engineering Project @ LNMIIT that monitors heart rate, SpO2 in blood, environment's temperature, humidity, heat index, and step counter. Created a local dashboard and synced data with the cloud.

Education

2021-2023
2 years

Master of Technology

8.16/10 SGPA

Automation & Robotics Engineering
Defence Institute of Advanced Technology, Pune

2015-2019
4 years

Bachelor of Technology

8.16/10 CGPA

Mechanical Engineering
LNM Institute of Information Technology, Jaipur

Experience

2017

Automation of Dal Agitation & Mixing Process

The Akshaya Patra Foundation (TAPF)

Suggested a set of solutions to avoid the inconsistency of dal cooked for Mid-Day Meal Program

Hobbies

- Exploring new technologies like Blockchain,
- Reading Articles on related to current affairs,
- Making Robots and Apps
- Playing PC Games
